

MSU Equine Extension is working to develop a 60-90 minute weekly Equine Education presentation series to be held each fall on the MSU Bozeman campus. The presentations can be broadcasted live to other MSU campuses and recorded for on-demand viewing. We would like to get your input on topics that would be of interest to you. Additionally, we want to know the most convenient start time a best day for most people.

### Equine Topics

For each topic, circle number based on preference (1=least and 5=most)

Nutrition – Feeds/Feeding/Supplements

1      2      3      4      5

Preventive Health Care – Infectious Diseases and Vaccinations

1      2      3      4      5

Parasitology – Internal and external parasite prevention and control

1      2      3      4      5

Hoof Care – Trimming, shoeing and maintenance

1      2      3      4      5

Tack – What, Why and How

1      2      3      4      5

Environmental Issues – Pest Control/Water Sources/Poisonous Plants

1      2      3      4      5

Anatomy and Conformation

1      2      3      4      5

Equine Dentistry

1      2      3      4      5

Pasture Management – Grazing Habits/Weed Control/Fencing Options/Manure Management

1      2      3      4      5

Reproduction - Breeding/Foaling

1      2      3      4      5

First Aid and Wound Management for Horses

1      2      3      4      5

Common Ailments of Horses

1      2      3      4      5

Evolution of the Horse

1      2      3      4      5

The Horse in Human History

1      2      3      4      5

Select the most convenient day and time for attendance and participation:

Day of Week

Monday              Tuesday              Wednesday              Thursday              Friday

Start time

5:30 pm              6:00 pm              6:30pm
